Summary

Computer Science undergraduate with a strong foundation in programming, data analysis, and problem solving. Experienced in building practical projects using Python and SQL, with a focus on automation and data-driven solutions. A quick learner and effective team collaborator, looking to contribute technical skills to a growing organization.

Technical Skills

Programming: Python, SQL, C, C++

Data Analysis: Pandas, NumPy, Matplotlib, Seaborn

Data Visualization: Power BI, Tableau

Databases: MySQL, PostgreSQL, Snowflake

Web Development: Flask, REST APIs, React

Tools & Platforms: Git, GitHub, Docker, Redis, Excel, Jupyter Notebook

Soft Skills: Analytical Thinking, Problem Solving, Communication, Leadership, Team Collaboration

Projects

Insyte – Smart Dataset Analyzer — [Live Demo](#)

April 2026 – May 2026

Python, Pandas, NumPy, Matplotlib, Streamlit

- Designed an automated system to process datasets with 1000+ rows and generate statistical summaries.
- Implemented data cleaning techniques to detect missing values, duplicates, and inconsistencies, reducing manual effort by 30%.
- Produced 5+ types of visualizations for quick interpretation of key variables.
- Automated insight generation, reducing analysis time by 40%.

IPL Data Analysis

Feb 2026 – Mar 2026

Python, Pandas, NumPy, Matplotlib, Seaborn, Power BI

- Analyzed IPL datasets covering 15+ seasons and 10,000+ match records to extract player and team performance trends and match insights.
- Cleaned and structured raw data, improving accuracy by 20% and ensuring consistency across records.
- Created 10+ visualizations to highlight top performers, scoring patterns, and team statistics.
- Identified venue-based trends and win probabilities to support strategic analysis.

Education

B.Tech in Computer Science and Engineering (Specialization: Data Science)

2023 – 2027

JSS Academy of Technical Education, Noida

CGPA: 7.16 / 10.0

Certifications & Achievements

- **Data Analytics Job Simulation** – Deloitte (Forage, April 2026); completed practical tasks in data analysis and forensic technology
- **Data Management Certification** – TCS iON (July 2025); covered data handling, storage, and data processing fundamentals
- **Selected for Smart India Hackathon 2025 (College Round)** as part of a team; developed an AI/ML-based text-to-text machine translation system for converting Nepalese and Sinhalese text into English
